SUMMARY:

- **Dedicated Software Engineer** with **1.5 years** of experience in **JavaScript** and **React**.
- Proficient in **frontend and backend technologies**, including **Next.js**, **Node.js**, and **MongoDB**.
- Optimized complex Next.js applications, achieving **up to 40% faster load times** with streamlined, responsive designs.
- Eager to contribute to **innovative projects** in a forward-thinking environment.

SKILLS:

- **Programming Languages:** JavaScript | TypeScript | HTML | CSS
- **Frameworks & Libraries:** Next.js | React | Redux | Tailwind CSS
- **Backend & Database:** MongoDB | Prisma | Node.js | JWT (JSON Web Tokens)
- **Other Tools:** Git | Linux | VsCode | Postman

WORK EXPERIENCE:

Fi Elements

Associate Software Engineer | 21 February 2022 - 11 August 2023

- **Technical Support:** Provided responsive technical support across multiple projects to ensure high levels of user satisfaction and retention.
- **Design Collaboration:** Collaborated with a design team, implementing web designs provided through Figma, translated design concepts into user-friendly interfaces.
- **API Integrations:** Conducted API integrations across multiple projects, enhancing software functionality, enabled seamless interactions with external services.
- **Cross-Functional Collaboration:** Actively participated in cross-functional meetings.
- **Intern Guidance:** Took on the responsibility of guiding interns, providing mentorship and support in their professional development.
- **Project Contributions:** Contributed to the success of 5 software projects, showcasing adaptability and versatility in various domains.

EDUCATION:

Lovely Professional University (Punjab)

B.Tech in Computer Science | 2018 - 2022

PROJECTS:

PlantsZen: E-commerce Platform for Plants

Nextjs, TypeScript, MongoDB, Node.js, React

- Developed a platform enabling users to browse and purchase plants, featuring user accounts, plant categorization, and personalized preferences.
- **Database Design and Implementation:** Database structure to efficiently store plant information, user data, and categories.
- **Backend:** Manage user authentication, plant retrieval, and category management through well-defined API endpoints.
- **Frontend:** To craft a visually appealing and user-friendly interface, ensuring a seamless user experience.
- **Admin Panel:** Created an admin panel for streamlined plant and category management.

Piclogue: Social Media Platform

Nextjs, TypeScript, Prisma, Tailwind CSS

- Built a social media application where users can post images, share thoughts, and follow other users.
- **Performance Optimization:** Implemented infinite scroll with **React Query** for enhanced user experience and efficient content browsing.
